

PARTIAL YEAR RESIDENT PRORATION WORKSHEET

This worksheet needs to be completed if you moved from one or more municipalities into another during the tax year. It will help you to determine the amount of earned income and net profits to file with each municipality that you resided in during the tax year. You will need to file a separate return for each municipality you resided in. The day an individual's domicile changes is included as the day he/she is in the new domicile. Determining which municipality to include the taxable local income earned for the month the move occurred should be based on the majority of days in the old or new domicile. If the number of days in the calendar month in which an individual lived in the old and new domiciles are equal, the entire month should be credited to the new municipality. For each W-2, employee business expense (EBE) schedule, self-employment schedule, or other income, divide the total on each form by the number of months you worked for that employer. Multiply the result by the number of months you lived in each location while working for that employer. (Domicile = Residence)
